

## News Flash:

# Absolute Proof that *Revatrol* Contains MORE THAN 100mg of Actual Resveratrol\*

**There's just one catch: *Revatrol* continues to SELL OUT every production run so quickly that we now have only enough for the first 2,000 people who re-order.**

Dear Friend,

Late last year, the world renowned Harvard Medical School released news of a breakthrough study on a key ingredient in Red Wine – Resveratrol.

According to Dr. David Sinclair of the Harvard Medical School Study... "It's the Holy Grail of aging research."

So when the results from this **Harvard Medical School study on Resveratrol, which may have revealed the French secret to living a lot healthier and up to 42% longer** were released, it spread like wild fire all over the world.

Literally hundreds of major TV news stations, newspapers, and news magazines in dozens of languages around the world picked up the story, many of which sought my thoughts on the implications.

I'm Dr. William S. Gruss M.D., cardiologist and internist, and I'm known as one of the world's leading medical advocates for resveratrol and antioxidants.

The fact is, this was purely an animal study and doesn't really tell us much more than what many of us in the medical industry already suspect, which is... **Resveratrol may be the single most important anti-aging supplement ever discovered by science.**

**We're talking about how long you're going to live!**

While I believe that human studies will eventually prove me correct, all we have for now with regards to humans is the anecdotal stories that have circulated over the past 30 years about the benefits of moderate red wine consumption.

INDEPENDENT LABORATORY RESULTS  
CONFIRM REVATROL DELIVERS MORE  
THAN IT PROMISES!

✓ MORE TRANS-RESVERATROL  
✓ MORE RESVERATROL  
✓ ACETYL-L-CARNITINE  
✓ ALPHA-LIPOIC ACID  
✓ QUERCETIN

ACTUAL LAB REPORT!

**Even Fortune Magazine featured the Harvard Study on its February 2007 Cover!**

**Over Please...**

The most famous anecdotal example was, of course, the CBS *60 Minutes* feature story on the "Red Wine Paradox" back in the late 1970s, which attempted to address why people in France can eat such a high fat diet, smoke and drink what they like, and still live so much longer and healthier.

Since the airing of the *60 Minutes* story and other anecdotal case studies over the years, moderate wine consumption has been recommended by many very reputable cardiologists and physicians around the world, as well as myself, for decades.

See the value for yourself...

## Only Revatrol gives you the HIGHEST potency and quality!

Brand Name	Red Wine Extract	OPC Level	Actual Resveratrol <sup>1</sup>	Alpha Lipoic Acid	Acetyl L-Carnitine	Quercetin

So, when the opportunity to help develop **Revatrol** arose, I jumped at it. But... I insisted on three very fair, but iron clad, guarantees from the makers of **Revatrol**, **Renaissance Health Publishing, LLC...**

I believe **Revatrol** is the best anti-aging formulation available. I helped formulate it, I endorse it, and what's more – I take it everyday!

**First**, I insisted that **Revatrol**

HAD to contain the highest possible bio-flavonoids called oligomeric proanthocyanidins – or OPCs.

OPCs are VERY IMPORTANT because they fight free radicals that cause accelerated aging and are crucial for supporting healthy circulation and strengthening capillaries.

But you need a high concentration of OPCs in your body to get the full benefit!

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to treat, diagnose, cure or prevent any disease.

So, the higher the percentage of OPCs you take, the more of the active ingredient you get, and the more powerful the free-radical neutralizers you get working in your body.

The highest amounts of OPCs are found in red wine. They are also found in most berries, turmeric, apples and even dark chocolate... but they are the highest in red wine.

Most brands of red wine supplements that compete with **Revatrol** have 5% of OPCs at best. Some, I've found, have only a disgraceful TWO PERCENT, but...

**Revatrol** has the most OPCs I've ever seen offered – an astonishing 95%!

**Second, Revatrol's** formulation had to include three anti-oxidants that I consider key to anti-aging and better health: **Alpha Lipoic Acid, Acetyl-L-Carnatine and Quercetin.**

- **Alpha Lipoic Acid** is one of nature's most versatile antioxidants with two important jobs: First, it neutralizes free radicals, which helps protect your brain, eyesight, liver and overall energy level. Alpha lipoic acid is a key brain protector because it is BOTH water and fat soluble, so it can get to all places in the body, including your brain, where it can protect you from a free radical attack.

Alpha lipoic acid rejuvenates exhausted antioxidants like vitamins E and C, and coenzyme Q10. For example, alpha lipoic acid replenishes vitamin E as it is used up fighting free radicals oxidizing LDL "bad" cholesterol. Once replenished, the vitamin E can get back to doing its job to squash free radicals.<sup>(1)</sup>

***It's like having a constant supply of reinforcement soldiers that are always ready and able to take over so there's a fresh fighting force!***

It has also been shown to improve blood flow to peripheral nerves and stimulate the regeneration of new nerve fibers – this is important for people who have to constantly worry about the side effects of unbalanced blood sugar levels.

- **Quercetin** is another powerful antioxidant that occurs naturally in red wine, however, it's found in the highest amounts in the skins of apples, tea, onions, nuts, berries, cauliflower and cabbage.

**Quercetin has many of the same properties as resveratrol**, and when they are combined together, quercetin makes resveratrol work better in your body by increasing bio-availability!

**\*\* Competitors are forced to sell their Resveratrol products at deep discount prices – they just can't compete with the superior ingredients in the *Revatrol* formulation!**

## The French Paradox:

**2-3 glasses of wine a day reduced death rates by 30%!**

“Paris (AP World News) 19 February 1998 – “The French scientist who showed the world that wine is good for the heart has a new discovery. Two to three glasses of wine a day reduce death rates from all causes by up to 30 percent. Serge Renaud states in the *Journal of Epidemiology*, ‘wine protects not only against heart disease, but also against most cancers.’ His study of 34,000 middle-aged men living in eastern France supports what has become known as the ‘French Paradox.’

“Frenchmen eat lots of saturated fats, but still live a long time. The results were the same for smokers, nonsmokers and former smokers, he said. There were no differences between white-collar and working-class drinkers. In addition, recent studies in the United States found that a drink of almost any alcohol can lower death rates by reducing the risk of cancer disease. Renaud, however, maintains that wine is the answer. It acts against heart ailments in cancers because of its antioxidant action of the polyphenol compounds in the grapes (the OPCs or proanthocyanidins). He warns, however, ‘wine is a more diluted form of alcohol and must be taken in moderation. After four glasses a day, wine has an adverse affect on the death rates and, although it still protects the heart, excess drinking raises the dangers of cancers and liver disease.’”

**In the *Epidemiology* article, Renaud reported a 30 percent reduction in death rates from all causes from two to three glasses of wine per day, a 35 percent reduction from cardiovascular disease, and a 24 percent reduction from cancer.** He is a cardiologist who works with the prestigious Inserm Unit at the University of Bordeaux. His book, *Healthy Diet*, is popular in France.”

Remember, **Revatrol** gives you the equivalent of resveratrol found in 50 bottles of red wine - in one pill!

That's great because resveratrol has a tough time on its own getting into the body. Quercetin, just like in a glass of wine, helps get it to work more efficiently. Quercetin also has some other important qualities such as reducing chronic pain in some types of non-bacterial prostatitis.\*

Many other red wine extract products leave out this important ingredient, making them much less compelling formulations than **Revatrol**. You won't find resveratrol and quercetin together in most other formulas!

- **Acetyl-L-Carnitine** helps your heart and brain by transporting fats into the "engine" powerhouse of each cell – your mitochondria – where the fat is burned for energy. This natural energy keeps your body moving and your heart pumping strongly. Simply put... you can't burn fat without it!

Acetyl-L-Carnitine also has potent antioxidant activity. Several gold standard studies show that it helps people who've had strokes and advanced memory and cognitive loss.

For instance, a double-blind placebo study was done on 130 patients with advanced cognitive problems. It followed their progress or deterioration for a year straight. At the end of the year, there was a statistically significant difference in how these patients scored on their logical intelligence, long-term verbal memory and attention.<sup>(2)</sup>

Another double blind placebo study showed that acetyl-l-carnitine can help support good concentration and attention.<sup>(3)</sup>

**Third**, I wanted to be able to change **Revatrol** at any time if I believe the change would be an improvement. Thanks to a lot of hard work and research, **Revatrol** now contains **100mg of actual Resveratrol, the equivalent of 50 bottles of red wine.**

I like this amount of 100MG of Resveratrol in concert with the 95% OPC level, **Alpha Lipoic Acid, Acetyl-L-Carnitine** and **Quercetin**. While it is not equivalent to the 750 to 1,500 bottles a day fed to the mice (can you imagine that much?) used in the Harvard Medical School study, it is a formulation I believe, as a physician and cardiologist, that makes sense.

Studies suggest that resveratrol increased mitochondrial biogenesis leading to increased exercise endurance and protection from diet

You can find this report on our website at [www.revatrol.com](http://www.revatrol.com)

(2) Physician's Desk Reference for Nutritional Supplements, 1st edition 2001. (3) Ibid.

(\*) Shoskes DA, et al. Quercetin in men with category III chronic prostatitis: a preliminary prospective, double-blind, placebo-controlled trial. Urology 1999;54:960-3

induced obesity. There was a loss of weight due to decreased fat, and this was attributed to an increase in the number and function of mitochondria. There also was improved insulin sensitivity and an increased metabolic rate. It actually switches on the genes that repair DNA and help you avoid the bad effects of a calorie-laden, high fat diet.

This new formulation of **Revatrol** contains no alcohol, no sugar, and no calories and has no side effects. Just one caplet a day is designed to help you fight fatigue and feel more energized, protect your heart and arteries, and maintain better cholesterol levels while also keeping your skin looking firm, fresh and vibrant; benefits all associated with moderate red wine consumption and the anti-oxidant formulation in **Revatrol**.

## The rapidly increasing demand for *Revatrol* has created a supply/demand imbalance.

There's just one catch to this good news, and the new formulation for **Revatrol**. We're selling out so quickly that every 50,000 boxes sells out in just a few weeks. Our U.S. based laboratory is working at full capacity, but the next 50,000 boxes of **Revatrol** won't arrive for another 6-8 weeks. Honestly, demand has been so strong that we are adding new **Revatrol** buyers faster than we ever imagined. Tens of thousands of people have already purchased **Revatrol**.

After looking over the scientific evidence you will believe, as I do, that **Revatrol** is a must-take supplement every day and if you want to start taking this new 100MG Actual Resveratrol formulation, you must order immediately. How long you live matters!

This new **Revatrol** formulation costs almost 30% more to produce, but through this offering, we're holding to our original low price to YOU.

**CLICK HERE TO ORDER NOW**

## ONE caplet a day gives you the equivalent of 50 bottles of Red Wine!

No more gulping down a bunch of pills like you have to with a lot of other natural supplements. With **Revatrol** you only need to take ONE caplet a day. Because it's a caplet — not a tablet — it's easier to swallow, too! So just take one per day and forget about it for the rest of the day. It feels great to know that when it comes to your health — you're COVERED!

One caplet of *Revatrol* gives you:

Red Wine Extract .....	100 mg
Actual Resveratrol.....	100 mg
Quercetin .....	100 mg
Acetyl-L-Carnitine .....	100 mg
Alpha Lipoic Acid .....	100 mg

## If you want guaranteed value at the best price...

Why pay the same or more for red wine extract that has FEWER milligrams of resveratrol? **Revatrol** gives you 100 mg of actual resveratrol — the highest amount of any formula out there — and also includes 3 extra “boosters,” antioxidants, alpha-lipoic-acid, quercetin and acetyl-l-carnitine, and the highest OPC rating of 95 percent!

All-in-all, you get the most for your money... and with the 100 percent money-back guarantee, you can be sure you never risk a penny for trying it.

Remember, studies suggest the anti-oxidants included in the *Revatrol* formula are very powerful:

- 20 times more powerful than Vitamin C
- 50 times more powerful than Vitamin E
